[Job Title]

[Company Name]

Re: Application for [Job Title] at [Company Name]

Dear [Hiring Manager's Name / Recruitment Team],

I am writing to express my strong interest in the **[Job Title]** role at **[Company Name]**. As a motivated second-year IT student specializing in web development at ISET Tozeur, I build full-stack web applications end-to-end and already integrate AI into real, deployed projects. I believe my practical experience and drive to grow make me a strong candidate for this opportunity.

What I bring:

› **Full-Stack Development** — 6+ web applications across Angular, Python/FastAPI, PHP/Laravel, Firebase, and MongoDB. I handle front-end, back-end, and database layers equally well.
› **AI Integration** — Certified in Generative AI (Udacity + GoMyCode via Abdulla Al Ghurair Foundation). I integrate AI assistants, LLM APIs, and Make.com automation into production applications.
› **Leadership & Communication** — Led development teams as a team lead-intern. Certified in Scrum/Agile. Fluent in Arabic, French, and English, with advanced Spanish.
› **Versatile Background** — Online language tutor, fitness coach, content creator, and community project manager. I bring adaptability, work ethic, and a people-first mindset.

What draws me to **[Company Name]** is [mention 1–2 specific reasons — tech stack, mission, culture, or projects]. I'm confident my energy, technical depth, and collaborative nature would make me a genuine asset to your team.

I have attached my CV and would love to discuss how I can contribute. I am available for an interview at your earliest convenience.

Thank you sincerely for your time and consideration.

Warm regards,

Manar Degachi
