Re: Application for **[Job Title]** — Manar Degachi

Dear [Hiring Manager's Name] / Dear Recruitment Team,

I am writing to express my enthusiastic interest in the **[Job Title]** position at **[Company Name]**. As a highly motivated second-year IT student at ISET Tozeur, Tunisia, specializing in web development, I am actively building a career as a full-stack web developer — with a clear, intentional roadmap toward mobile development and, ultimately, AI engineering. I believe my technical depth, drive, and diverse experience make me a strong candidate for this opportunity.

What I bring to this role:

› **Full-Stack Web Development —** I build complete web applications from interface to database. My stack covers Angular, TypeScript, HTML/CSS on the front; Python (FastAPI), PHP (Laravel 12), and Node.js on the back; and Firebase, MongoDB, MySQL, and SQLite for data. I have delivered six real projects — including two internships — all fully functional and deployed.

› **AI Integration —** I already integrate Generative AI and LLMs into real, live projects. I hold two internationally recognized AI certifications from Udacity (via the Abdulla Al Ghurair Foundation) and GoMyCode. I understand prompt engineering, Make.com workflow automation, and AI assistant design — not as theory, but as tools I have shipped.

› **Leadership, Agile & Teamwork —** I led development teams during both internships, and I hold a Professional Scrum Master & Product Owner certification from ISET Tozeur. I communicate clearly, deliver on time, and adapt quickly. I am certified in Agile methodology and I practice it.

› **Multilingual Communication —** I am fluent in Arabic, French, and English, with advanced Spanish. I have tutored students internationally, translated for NGO partners, and managed cross-cultural projects. Communication — written and verbal — is one of my genuine strengths.

› **Work Ethic & Ambition —** Beyond code, I have coached fitness, created content, and led community projects since 2021. I am serious, disciplined, and hungry to grow. I do not wait for opportunities — I build them.

What draws me to **[Company Name]** is [write 1–2 genuine sentences about the company — their mission, tech stack, culture, or a project that impressed you. This is the one part to personalize]. I am confident that my energy, technical depth, and collaborative mindset would make me a genuine asset to your team.

I have attached my CV and portfolio (manardg09-code.github.io) for your review. I would be delighted to discuss how I can contribute to **[Company Name]** and would welcome an interview at your earliest convenience.

Thank you sincerely for your time and consideration. I look forward to hearing from you.

Warm regards,

Manar Degachi
