## PROFESSIONAL SUMMARY

Full-Stack & Mobile Development student (Angular, Laravel, Flutter) seeking a 2027 PFE / final-year internship on end-to-end software projects across web, APIs, mobile, databases and cloud. Shipped fixes in a production PHP/Laravel codebase during an internship at InnovQube and led a team to 1st place at a university hackathon. Additional interests: AI/ML, DevOps and application security. Open to relocation.

## TECHNICAL SKILLS

**Frontend:** HTML5, CSS3, JavaScript, TypeScript, Angular, React, Bootstrap
**Backend:** PHP, Laravel, Symfony, Java, Spring Boot, Python, FastAPI
**Databases:** MySQL, PostgreSQL, MongoDB, Redis, Firebase (Firestore), Oracle SQL*Plus
**Mobile:** Flutter, Dart, FlutterFlow, Kotlin, React Native, Firebase
**Testing & Tools:** PHPUnit, JUnit, Mockito, Cypress, Postman, Git, GitHub, GitLab, Docker, Jira, OpenProject
**Data & BI:** Big Data, data analysis, Business Intelligence (BI), Power BI
**DevOps, Security & Networks:** DevOps (Docker, Git workflows); working knowledge of cybersecurity and networking
**AI & Automation:** Generative AI, Gemini API, Make.com, GitHub Copilot, Cursor, AI-assisted development
**Practices:** REST APIs, debugging, code review, application security, tenant/data isolation, migrations, Agile/Scrum

## PROFESSIONAL EXPERIENCE

**Web Development Intern — InnovQube, France** *July – September 2026 | Remote*

- Fixed bugs and security issues in a production PHP/Laravel app: tenant/data isolation, migrations, webhook processing.
- Delivered changes through Git and Docker workflows, merge requests, code review and automated tests.

**Full-Stack Web Developer Intern — Fréquence Santec, Tunisia / France** *January – February 2026 | Hybrid*

- Contributed to the Innera platform (Angular, Firebase): authentication, real-time features, AI-assisted automation.

**Web Development Intern — Addinn IT Factory, Tunisia** *January – February 2025 | Onsite*

- Built a responsive website for a nonprofit organization using HTML, CSS, JavaScript and Bootstrap.

## SELECTED PROJECTS

**Vesta — Real-Estate Rental App** *(In progress, 2026)* **— Flutter, React Native, Firebase (Auth, Firestore, FCM).** Team of 4, group leader. Rental listing app built twice (Flutter and React Native) on a shared Firebase backend; OpenStreetMap integration, C4 architecture documentation, Scrum on Jira and a GitHub monorepo with PR reviews.

**LeakLens — Hidden Water-Leak Early Warning** *(Prototype)* **— Flutter, FastAPI, MongoDB, HTML/CSS/JS.** Hackathon prototype that analyzes household water consumption and flags possible hidden leaks: confidence score, estimated daily waste and monthly cost, suspected fixture and explanation (rule-based engine). Web app, Android app and REST API with authentication.

**Raad — Delivery Platform** *(In progress, 2026–2027)* **— Kotlin, React Native, Angular, FastAPI, Firebase.** Delivery platform made of two mobile apps (Kotlin and React Native) and two web apps (Angular), served by a FastAPI backend with Firebase.

**Ommek Sannefa — FlutterFlow, Firebase (Firestore).** Fully working team recipe app: categories, recipe list and favorites.

**University Hackathon — 1st Place — Team Leader & Developer.** Led the team, contributed to the solution and delivered the final pitch (May 2026).

**Innera Platform — Angular Standalone, Firebase, Make.com, Gemini.** AI-assisted private community app (posts, likes, comments, profiles) combining cloud services, automation and generative AI.

**Full-Stack E-Commerce Platform — Angular, Spring Boot, PostgreSQL, Redis.** Frontend-backend integration with caching and a full automated test suite (Cypress, Postman, JUnit, Mockito).

**Building Reservation System — Laravel, Livewire, MySQL.** Booking application with real-time, reactive reservation management.

**Sports Booking System — Python (Tkinter), MongoDB, AI Chatbot.** Desktop booking app: user accounts, facility availability lookup, admin panel and an AI chatbot.

## CERTIFICATIONS

- **AWS Cloud Practitioner** — AWS Academy
- **Docker Foundations** — Docker
- **Cybersecurity Threat Landscape** — Microsoft
- **Generative AI Professional** — Snowflake
- **GitHub Copilot Prompt Writing** — Microsoft
- **Professional Scrum Master (PSM)** — Scrum.org
- **AI for Marketing with Microsoft 365 Copilot** — Microsoft
- **Certification IA générative** — GoMyCode & AGF
- **Microsoft Security Essentials** — Microsoft
- **Atlassian IT Service Management (ITSM)**— Altassian

## EDUCATION

**Bachelor's Degree (Licence) in Web & Mobile Development — ISET Tozeur**

*Expected graduation 2027*

**High School Diploma, Science — Abu Al Kacem Chebbi**

*2024*
