

# MANAR DEGACHI

Software Development Student | Full-Stack Developer | AI & Machine Learning Enthusiast

Tozeur, Tunisia • +216 50 416 574 (WhatsApp) • +216 99 785 376 (Calls) • manardg09@gmail.com • github.com/manar09-code • manar09-code.github.io/Portfolio • linkedin.com/in/manar-degachi

## PROFESSIONAL SUMMARY

Led her team to 1st place at a university hackathon and shipped real fixes in a production PHP/Laravel codebase during a software development internship at InnovQube. Full-stack developer (Angular, Laravel, Python) with a growing focus on AI and Machine Learning, looking for a PFE/final-year internship in software development from 2027.

## TECHNICAL SKILLS

**Frontend:** HTML5, CSS3, JavaScript, TypeScript, Angular, Bootstrap

**Backend:** PHP, Laravel, Symfony, Java, Spring Boot, Python, FastAPI

**Databases:** MySQL, PostgreSQL, MongoDB, Redis, Firebase, Oracle SQL\*Plus

**Testing & Tools:** PHPUnit, JUnit, Mockito, Cypress, Postman, Git, GitHub, GitLab, Docker, Jira

**AI & Automation:** Generative AI, Gemini, Make.com, GitHub Copilot, Cursor, AI-assisted development

**Practices:** REST APIs, debugging, application security, data isolation, database migrations, Agile/Scrum

## PROFESSIONAL EXPERIENCE

### Web Development Intern — InnovQube, France

July – September 2026 | Remote

- Worked on a real-world PHP/Laravel application, contributing to debugging, security, tenant isolation, and webhook processing.
- Delivered fixes via Git/Docker, merge requests, code review, and automated tests.

### Full-Stack Web Developer Intern — Frequence Santec, Tunisia - France

January – February 2026 | Hybrid

- Contributed to the Innera platform (Angular, Firebase): authentication, real-time features, and AI-assisted automation.

### Web Development Projects — Addinn IT Factory, Tunisia

January – February 2025 | Onsite

- Built a website for a nonprofit organization (HTML, CSS, JavaScript, Bootstrap) with functional and responsive interfaces.

## SELECTED PROJECTS

**Innera Platform** — *Angular Standalone, Firebase, Make.com, Gemini*. AI-assisted web platform combining frontend development, cloud services, automation, and generative AI for a private community app (posts, likes, comments, profile management).

**University Hackathon — 1st Place** — *Team Leader, May 2026*. Led the team, contributed to solution development, and delivered the final pitch and presentation.

**Full-Stack E-Commerce Platform** — *Angular, Spring Boot, PostgreSQL, Redis*. Frontend-backend integration with caching and a full automated-testing suite (Cypress, Postman, JUnit, Mockito).

**Phone Accessories Manager** — *Angular, FastAPI*. Angular frontend (dashboard, products, login) with a FastAPI backend exposing CRUD operations for articles. API testing with Postman.

**AI Football Language Coach** — *Angular, Firebase, MYSQL*. Firebase authentication and a unified Login/Register interface; AI language-learning module designed for future integration. Database following tables and information progress.

**Sports Booking System** — *Python, MongoDB, AI ChatBot*. User accounts, facility availability lookup, and an admin panel with a touch of AI and data analysis using libraries (Tkinter).

## CERTIFICATIONS & ACTIVITIES

- Generative AI Certification — GoMyCode & AGF
- Gen AI Professional — Snowflake
- GitHub Copilot Prompt Writing — Microsoft Copilot
- AWS Cloud Practitioner — AWS Academy
- Docker Foundations — Docker
- Cybersecurity Threat Landscape — Microsoft
- Scrum Master & Product Owner — ISET Tozeur
- AI Workshop — ELIFE Tozeur
- TCB-SCALE 2026 Webinar — Game Tunisia

## EDUCATION

### Bachelor's/Licence in Web & Mobile Development

ISET Tozeur | Expected graduation 2027

### High School Diploma — Science

Abu Al Kacem Chebbi | 2024

## LANGUAGES

**Languages:** Arabic — Native | French — Bilingual | English — Fluent (C1–C2) | Spanish — B1 | Italian — A1 | Portuguese — A1
